MXDR
- Kaspersky Next MXDR Optimum

Essential protection

for every business against commodity threats

Kaspersky Next EDR Foundations

+

- Kaspersky Security for Mail Server
- Kaspersky Automated Security Awareness Platform
- Kaspersky Hybrid Cloud Security

Comprehensive defense

for enterprises of every size against complex and APT-like attacks

[for mature IT security experts and SOC teams]

Kaspersky Next Expert

- Kaspersky Next EDR Expert
- Kaspersky Next XDR Expert

+

- Next-gen SIEM: Kaspersky Unified Monitoring and Analysis Platform
- NDR: Kaspersky Anti Targeted Attack
- MDR: Kaspersky MDR
- Threat Intelligence: Kaspersky Threat Intelligence
- Expert Services: Kaspersky Security Services

Targeted solutions

- For critical infrastructure: Kaspersky Industrial CyberSecurity
- For distributed networks: Kaspersky SD-WAN
- For securing containerized apps: Kaspersky Container Security
- For isolated networks and data-sharing restrictions: Kaspersky Private Security Network
- Protection for embedded devices: Kaspersky Embedded Systems Security
- Protection against online fraud: Kaspersky Fraud Prevention
- Protection for a wide range of applications: Kaspersky Scan Engine

Kaspersky Next offers a tiered approach that strengthens protection at every stage of your business growth. It helps defend against today's sophisticated and emerging corporate cyberthreats using advanced technologies that stop attacks in their tracks.

Kaspersky Next Optimum

For small and mid-sized businesses that want to scale protection without adding complexity.

Whether managed by IT or a small security team, this offering delivers easy-to-use tools with strong EPP, enhanced by EDR capabilities. It also provides a smooth path to essential XDR or MXDR for more advanced cybersecurity needs.

Kaspersky Next Expert

For enterprises that stay ahead of sophisticated threats by adopting the latest technologies and advanced security solutions.

This offering delivers advanced EDR and XDR capabilities, powerful automation and flexible expansion through on-demand technologies, enabling larger security teams to maximize their impact.

Turning IT & OT risks into resilience

Kaspersky for IT environments

XDR Corporate

Kaspersky Next XDR Expert

As the most advanced tier in the Next product line, Kaspersky Next XDR Expert gives your security team or SOC complete control over your protected infrastructure.
It provides full visibility, real-time correlation and automation, using a wide range of response tools and data sources including endpoint, network and cloud data.

Open Single Management Platform

Kaspersky for OT environments

XDR Industrial

Kaspersky Industrial CyberSecurity

Kaspersky Industrial CyberSecurity is the core of Kaspersky OT Cybersecurity, functioning as an XDR platform for critical infrastructure.
It features natively integrated nodes and network security products for protection of modern and legacy OT assets, automation and control systems, without affecting technological processes or system availability.

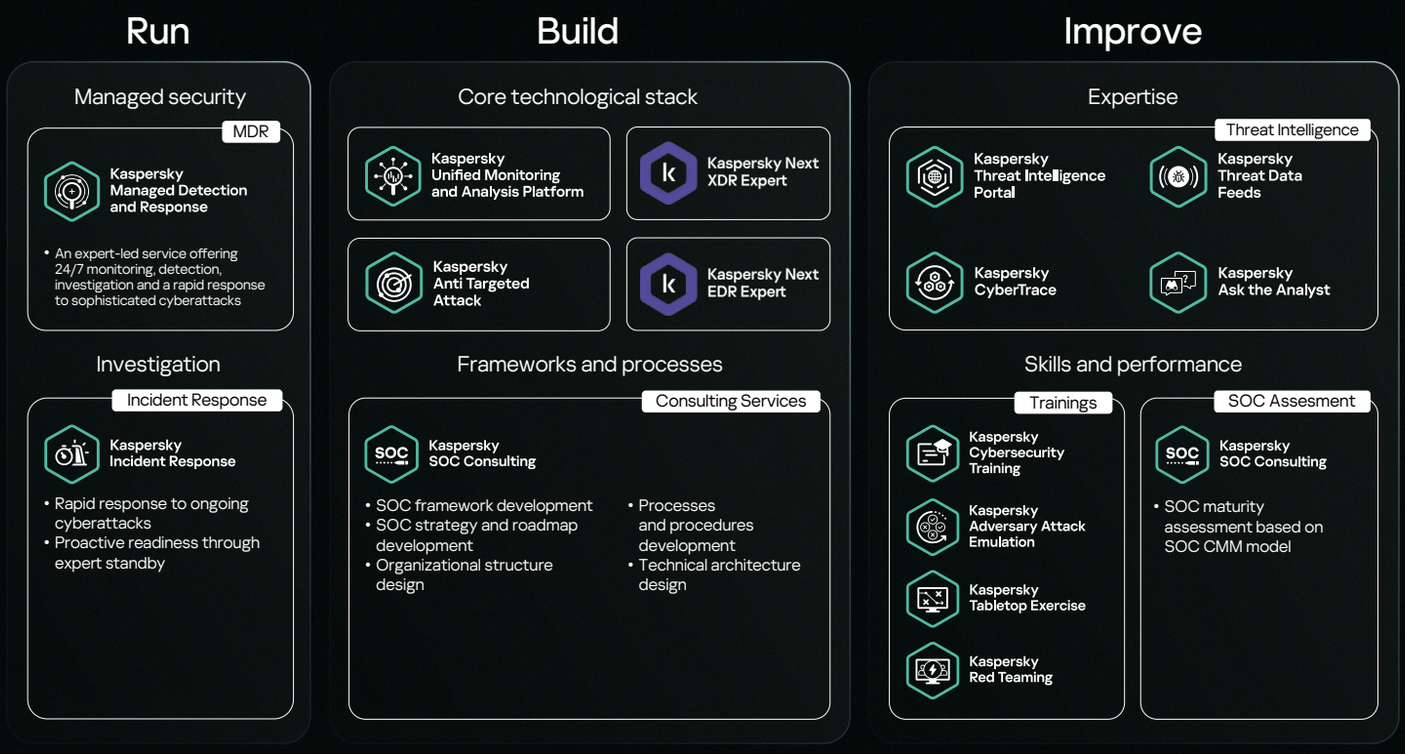

The Open Single Management Platform provides a comprehensive view of the organization's security posture and infrastructure. It streamlines incident management, administration and security maintenance.

- Incident management from a single console
- Automation and orchestration
- Deployment toolkit

The platform is a key embedded component of Kaspersky Next XDR Expert and our unified IT-OT XDR technology stack, helping to defend against complex cyberattacks that can move between IT and OT environments.

- Centralized asset and case management
- Playbooks
- Investigation graph

Guiding your SOC to expert-level efficiency

Solutions built for every stage of your SOC evolution

Learn more

Creating safe DevOps environments and protecting your cloud workloads

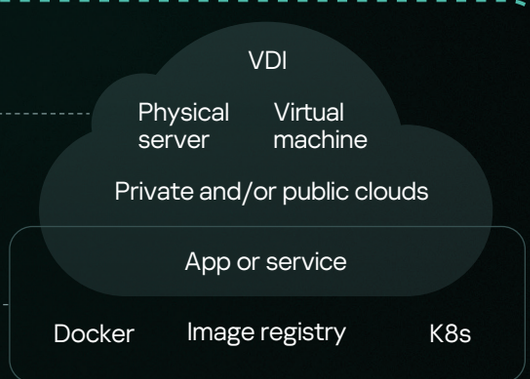

Kaspersky Cloud Workload Security

Kaspersky Hybrid Cloud Security

Secures your entire hybrid infrastructure against the broadest range of cloud-related cyberattacks while going easy on your resources

Kaspersky Container Security

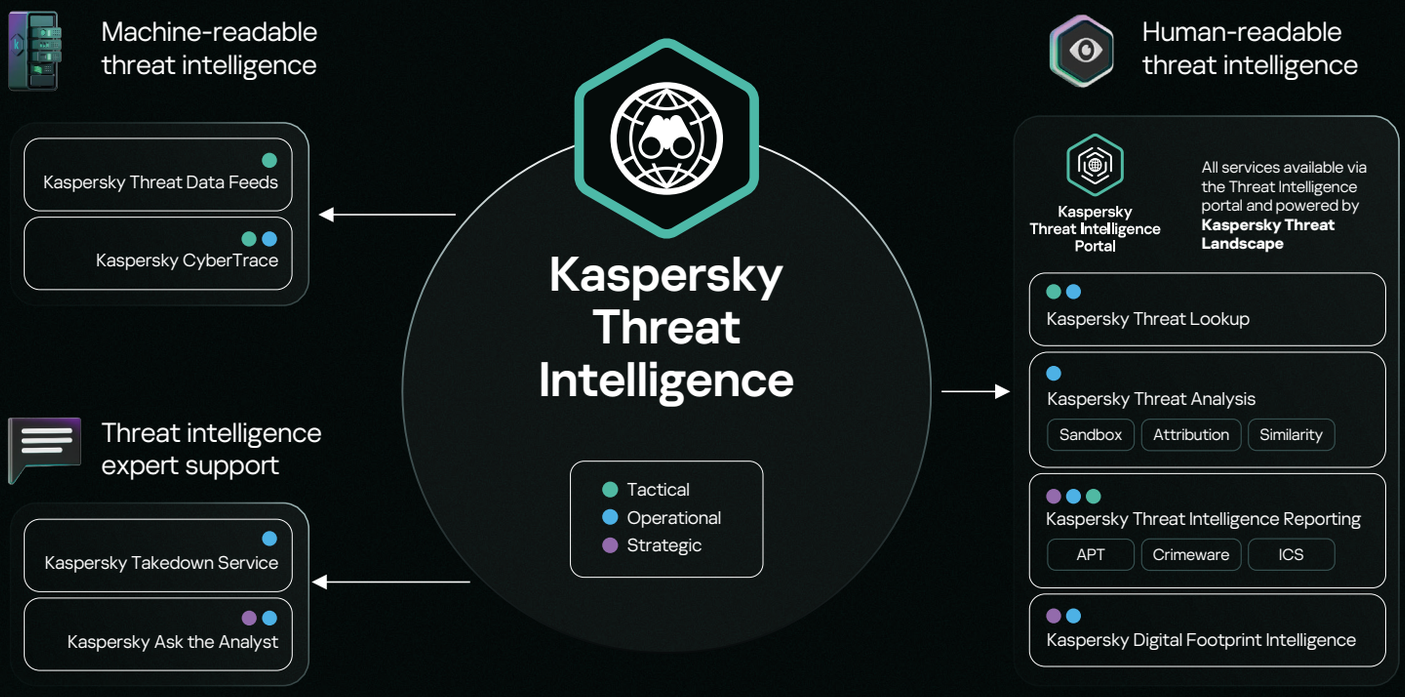

Protects your entire lifecycle of containerized apps, from development to operation

Developers rely on containerization, and businesses are scaling their cloud environments. However, the specific security risks of these environments can cause significant damage and require specialized protection solutions.

Learn more

Stay ahead of your adversaries

Detect emerging attacks earlier and make better security decisions with access to one of the world's largest cybersecurity knowledge bases.

Kaspersky is a leading global cybersecurity developer

~30 years

Developing world-class solutions that protect customers across 5 continents, with **~100 B2B and B2C products, 650+ annual releases** and **150+ service releases.**

Global-scale data intelligence

100M+ sensors across ~200 countries power one of the world's largest threat intelligence networks.

Active industry contributor

Working with global law enforcement, CERTs, INTERPOL and AFRIPOL to support the fight against cybercrime worldwide.

High level of Secure Software Development

Security embedded at every stage of development, independently validated by SOC 2 and ISO/IEC 27001), and strengthened by our unique Cyber Immunity approach built on our own OS.

Transparent and verifiable software

Open validation of code, updates and detection rules through our Global Transparency Initiative.

Kaspersky is a trusted cybersecurity partner

TOP 3

Proven protection, independently validated

Most tested. Most awarded. Kaspersky Protection. Stops threats automatically and frees experts to analyze complex incidents.

Independent trust verification

We demonstrate clear leadership across 14 assessed vendors in the Transparency review and accountability in Cyber security.

The only vendor delivering full cyber sovereignty

Full control over data, infrastructure and security operations — no vendor access, no remote management, no external dependencies.

5 unique Centers of Expertise

Decades of expert insight and AI-driven innovation strengthen every part of our cybersecurity portfolio.

Exclusive threat insights from high-risk regions

Providing second opinions on global threats and tracking 900+ APT actors and campaigns worldwide, regardless of origin, including state-sponsored actors.
